

Music studio in Helsinki

February 2005

First reference in Finland for the Akustik+Sylomer®

We have the pleasure of informing you about a very special reference for the "Akustik+Sylomer®". The order came through our sales partner from Finland Christian Berner OY based in Vantaa, Finland.

In this case the Akustik+Sylomer® ceiling mounts were used on the construction of a new Music studio in the city of Helsinki.

The acoustic consultant named AKUKON OY, recommended to use anti vibration mounts for the suspension of the false ceiling. The requested natural frequency was below 15 Hz.

The ordered products were the Akustik 1 +Sylomer 75 (Ref AMC: 25517) that give a natural frequency of 9Hz at their optimum loading point.

The works were done by the contractor Chartmakers Oy. What it has been special in this reference is that the ceiling mounts have been ordered and then dispatched in on a short time period of only 24 hours!
