

# Restaurant in central Gothenburg

May 2005

## First reference in Sweden for the Akustik+Sylomer®

We have the pleasure of informing you about a very special reference for the "Akustik+Sylomer®". The order came through the sales partner from Sweden called Christian Berner AB based in Partille.

In this case the Akustik+Sylomer® ceiling mounts were used on the construction of a new Restaurant called Wasa Allé, it is located in the central of Gothenburg, just a stone's throw from the Avenue. The building is from 1870 and the apartments above are expensive this is one of the reasons for the high acoustic demands.

The acoustic consultant named Bo Gärdhagen, recommended to use anti vibration mounts for the suspension of the false ceiling. The requested natural frequency was very low.

The ordered products were the Akustik 1+Sylomer 30 (Ref AMC: 25501) that give a natural frequency of 7,2Hz at their optimum loading point.

The works were done by the contractor Astor Bygg AB. The suspension is done with Gyproc GK system.

The products were available on stock and they were shipped on the same week of the order.
