

Restaurant of the Hotel Royal Olympic

October 2005

We have the pleasure of informing you about a very special reference for the "Akustik+Sylomer®". The order came through the sales partner from Greece Ergoakoustiki based in Athens, Greece.

In this case the Akustik+Sylomer® ceiling mounts were used on the false ceiling of a restaurant of the Hotel Royal Olympic in Athens.

The Hotel Royal Olympic is a 5 star hotel, delightfully situated just across from the Temple of Zeus, within walking distance from the Acropolis, the Old Town (Plaka) and the central shopping district.

The acoustic consultant of the work recommended to use anti vibration mounts for the suspension of the false ceiling. The requested natural frequency was below 15 Hz.

The ordered products were the Akustik 4 +Sylomer 75 (Ref AMC: 23529) that give a natural frequency of 9Hz at their optimum loading point.

The ceiling mounts had to be dispatched in very urgently in the last days of July in 24 hours in order not to stop the works. Since our products are usually in stock, this business did not have any hazards at all.
